

1. Check the fitment of the part with the bumper.

2. Attach the splitter to the bumper with a few screws to keep it sticking to the bumper.

3. Disassemble the bumper with the splitter.

More installation manuals on our website: www.maxtondesign.com/manuals

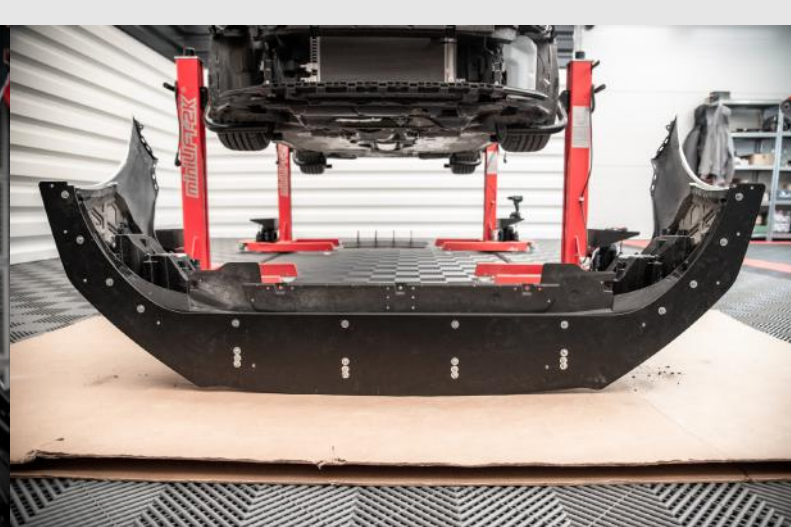

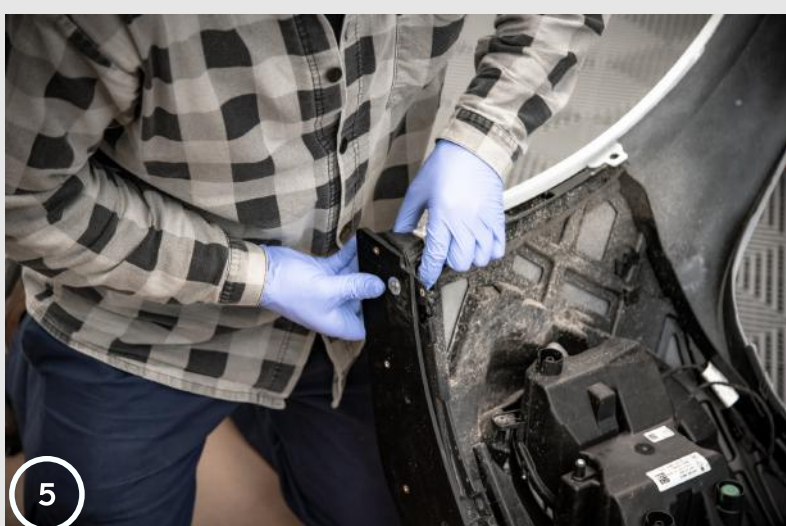

4. Drill the bumper in places consistent with the splitter holes.

5. Place the bolts in the holes - with the head from the ground side, with the thread from the inside of the bumper. When the splitter is attached with a few bolts, remove the screws (shown in step 2)

6. Tighten all bolts firmly (20 pieces).

7. After installing the splitter, reinstall the bumper to the car.
